Top 10 Things to Know: Flash Platforms and Solutions

- All Flash Storage Systems are the #1 Revenue Platforms Globally Across all Price Points
- The Need for Better Performance for Enterprise Application and Workloads will NEVER Diminish
 - All Flash Solutions at 35 microseconds of Latency are Available Today
- Key Differentiators for All Flash Platforms and Solutions are Heavily Software Driven
- Cyber Storage Security is Critical for All Flash Platforms
- Cyber Storage All Flash Platforms are ESSENTIAL for Comprehensive Corporate Cyber Security Strategies
- All Flash Platforms are Incorporating the Latest Interfaces – NVMe to Media and NVMe over Multiple Fabrics
- End Users are Expecting Tight AIOps Integration Across Data Center and Hybrid Cloud Deployments and Autonomous Automation for Substantial Reductions in IT Manpower Needs
- End Users Expect EVERY All Flash Platform Generation to have Lower CAPEX, Lower OPEX, and Better TCO
- All Flash Platforms Incorporate all Types of Flash - Performance, Durability, and Reliability Vary Flash Type to Flash Type
- Hybrid Storage Systems (Flash+HDDs) are NOT Dead – Still Very Important for Many Primary Storage Workloads and for Secondary Storage Workloads, as well
